would this be fair?

How would you like to play a basketball game with your opponents allowed a lower basket? Because of their poorer playing ability, the officials explain, this is only fair. You'd holler, wouldn't you?

Ridiculous, of course, but is it so farfetched? Karl Marx had such a theory, and Communism preaches this kind of doctrine.

Even some of our "big government" planners and bureaucrats think nothing of penalizing the good business players to aid the others.

In a true free enterprise business system, no one gets a lower basket. Anyone may play the game, but each wins or loses on his own merits. You don't get a "lower basket," nor is your competition given an advantage.

At I&M, we have grown and created new jobs by serving our customers better. By being a little "better players," we have developed ways of generating and delivering electricity and provided improved electric service at the lowest possible cost.
